No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     2, A

/desc = "peptide nucleic acid (PNB), where (deoxy/ribose-phosphate linkages are replaced by N-(2-aminoethyl)glycine units linked to nucleotide bases via glycine amino N through a methylenecarbonyl linker"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 31, Application US/09349532

Sequence 31, Application US/09349532

Patent No. 6294650

GENERAL INFORMATION:

APPLICANT: Wright, Woodring E.

APPLICANT: Wright, Woodring E.

APPLICANT: Platyszek, Mieczyslaw A.

APPLICANT: Orey, David R.

APPLICANT: Orey, David R.

APPLICANT: Profession of Mammalian Telomerase by TITLE OF INVENTION: Modulation of Mammalian Telomerase by TITLE OF INVENTION: Peptide Nucleic Acids

NUMBER OF SEQUENCES: 60

CORRESPONDENCE ADDRESS:

ADDRESSEE: Townsend and Townsend and Crew LLP

STREET: Two Embarcadero Center, Eighth Floor

CITY: San Francisco

STREET: Trailfornia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Length 11;

US-10-463-076-1
```

```
MOLECULE TYPE: other nucleic acid (PNA),
DESCRIPTION: /desc = "peptide nucleic acid (PNA),
DESCRIPTION: where (deoxy)ribose-phosphate linkages are replaced by
DESCRIPTION: N-(2-aminoethyl)glycine units linked to nucleotide bases via
1 DESCRIPTION: glycine amino nitrogen through a methylenecarbonyl linker"
US-08-630-019A-10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           other nucleic acid (PNA), desc = "peptide nucleic acid (PNA), where (deoxy/ribose-phosphate linkages are replaced by N.(2-aminoethy)glycine units linked to nucleotide bases via glycine amino N through a methylenecarbonyl linker"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              RESULT 37
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 8, Application US/10463076

Patent No. 6835826

GENERAL INFORMATION

APPLICANT: Geron Corporation

APPLICANT: Pongrazz, Kristina

APPLICANT: Pongrazz, Kristina

APPLICANT: Pongrazz, Kristina

APPLICANT: Pongrazz, Kristina

APPLICANT: Matray, Tracey

TITLE OF INVENTION: Oligonucleotide N3'-->P5' Thiophosphoramidates: Their Synthesis a

FILE REFERENCE: 039/004C

CURRENT APPLICATION NUMBER: US/10/463,076

CURRENT PILING DATE: 2003-06-17

PRIOR APPLICATION NUMBER: US 60/153,201

PRIOR PILING DATE: 1999-09-10

PRIOR PILING DATE: 1999-10-19
